3D/4D ULTRASOUND

For our patients who desire 3D/4D ultrasound, we are pleased to now offer this service. We would like you to know that our Ultrasound Department is full accredited. We want you to have proper expectations and to know the limitations of this new imaging technology.

There are several factors that may affect visibility of the baby and therefore may affect picture quality.

1. Maternal Weight-Patients whose weight exceeds 200 pounds may not have optimal picture quality
2. Baby's position
3. Amniotic fluid and location of the placenta

This exam is done between 26-30 weeks to try to optimize the fluid and space of the baby's environment. The fee covers the sonographer's time and the cost of the machine, with the 3D/4D capabilities; therefore, it is **non-refundable**.

The cost of a 3D/4D ultrasound is **\$125.00**, which is due at the time of service. This service is non-reimbursable by your insurance carrier. You will be responsible for the entire charge for this service.

We will provide you with pictures and "burn" the images to a CD. We **do not** provide the DVD+RW but if you would like to bring one to your appointment, we will be glad to record it on the DVD+RW for you.

Please arrive on time for your appointment. A delay in your ultrasound causes delays for other patients for the rest of the day.

We look forward to your visit with us.

Krishna K. Kakani, M.D, F.A.C.O.G
Sharon L. Callison, M.D., F.A.C.O.G
Anne Marie Reidy, M.D., F.A.C.O.G., J.D
